DETAILED ACTION

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-8 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 1 recites the limitation "a component" in line 4. There is insufficient antecedent basis for this limitation in the claim. The "component" recited in lines 1 and 3 are not the same element. Further, the claim should read as grammatically correct as possible. It is suggested "an" be inserted before "apparatus" in claim 1.

Regarding claim 6, the claim is a duplicate of claim 4, from which it depends.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-3, 5 and 9-15 are rejected under 35 U.S.C. 102(b) as being anticipated by Wilson et al, Cutchaw, Kikuchi et al, Helt et al, August et al, Fox et al, Budelman, Cheon or Hamilton et al. There is no structural limitation claimed in line 6.

Claims 1-3, 5 and 9-16 are rejected under 35 U.S.C. 102(b) as being anticipated by Butt or Iversen. There is no structural limitation claimed in line 6.

Art Unit: 3743

Claims 1-5 and 9-15 are rejected under 35 U.S.C. 102(b) as being anticipated by Messina et al (Figure 5). There is no structural limitation claimed in line 6.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 7-8 are rejected under 35 U.S.C. 103(a) as being unpatentable over Messina et al in view of Papst et al.

Messina et al discloses all the claimed limitations except an embedded pump.

Papst et al discloses a heat sink apparatus comprising a component 1 having fluid passageways defined by ribs 3-10 and embedded pump 15 for the purpose of optimizing space requirements.

Since Messina et al and Papst et al are both from the same field of endeavor and/or analogous art, the purpose disclosed by Papst et al would have been recognized in the pertinent art of Messina et al.

It would have been obvious at the time the invention was made to a person having ordinary skill in the art to employ in Messina et al an embedded pump for the purpose of optimizing space requirements as recognized by Papst et al.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
